

COLLEGE COURSES OPTIONS 2025 - 2026

All college courses have limited spaces. If uptake in a subject is very small it may not run.

When choosing a college course a second college option should be made in case the course does not run. A school based option should also be made in case you are not accepted into college. College courses are delivered by West College Scotland unless stated otherwise. Where it is advised that pupils must travel independently, this travel is still funded.

Foundation Apprenticeships are delivered as either a one year course or a two year course (indicated in the table below). One year courses are open to S5 & S6 pupils whereas two year courses are only open to S5 pupils. In most cases this will involve being out of school for four afternoons i.e. Column C and E. Foundation Apprenticeships will involve work experience and will require students to be flexible in their other studies.

For further details on College courses and Foundation Apprenticeships visit -
